

Build yourself a RAZC Sensor

Super Compact Model

Raztec can select from numerous magnetic materials and magnetic field sensors to build a sensor that best suits your needs for price and performance.

Choose your required performance from the list below then consult with Raztec to refine and cost your selection.

Maximum Measured Current	Temperature Range	Calibration	Speed	Supply Voltage	Linearity	Core Size
45amps	-40°C	+/-25%	35kHz	3V	1%	10mm OD
Nominate Current	Nominate Temperature Range	Nominate Calibration	Nominate Speed	Nominate Voltage	Nominate Linearity	
250amps	125°C	+/-1%	400kHz	8V	0.1%	16mm OD
